

Dr Paul Warden-Hutton

Paul has a PhD in Medical Science (Biophysics) with experience in the fields of biophysics, spectroscopy, biochemistry and computational chemistry. Paul's background in applied research has allowed him to develop expertise in both biotechnology and information technology. This expertise allows Paul to practice broadly across Fisher Adams Kelly's areas of technology. Before joining Fisher Adams Kelly, Paul worked for a Japanese firm of Patent Attorneys where he gained experience in Japanese prosecution of both Biotechnology and ICT related technologies. Paul can read and write Japanese.
